

MRIDUL KUMAR SHARMA

HYBRID CLOUD & INFRASTRUCTURE ENGINEER
| DEVOPS | BIG DATA PLATFORMS | MSC-AI
@HKUST

PROFESSIONAL SUMMARY

Hybrid cloud and infrastructure engineer with nearly 6 years of experience designing, maintaining, and automating large-scale Big Data and cloud platforms supporting critical business operations. Proven track record implementing and maintaining Hadoop and cloud environments end-to-end, including high availability, backup, disaster recovery, performance tuning, and capacity planning for enterprise clients in regulated industries such as financial services. Skilled in Linux system troubleshooting (memory, CPU, OS, storage, and network), infrastructure monitoring using events and alerts, and scripting-driven automation to enhance operational stability and efficiency. Currently pursuing an MSc in Artificial Intelligence at HKUST, complementing deep infrastructure experience with strong skills in automation, data-driven analysis, and modern cloud practices; AWS Solutions Architect Associate certified since 2022.

WORK HISTORY

phData - Senior Analyst / DevOps Engineer

Bangalore

01/2023 - 05/2025

- Maintained and supported enterprise Big Data platforms across cloud environments, including Hadoop clusters and associated services for global clients such as Mastercard, CHS, RGA, Navistar, IR, Trane, NMDP, and CFA.
- Automated smoke and sanity tests across the full Big Data ecosystem to continuously validate platform health and reduce manual verification effort.
- Configured and maintained high availability (HA) for key components in cloud environments, including cross-region setup for improved resilience and disaster recovery readiness.
- Performed troubleshooting, backup management, disaster recovery planning, capacity planning, performance tuning, upgrades, and issue resolution for Hadoop clusters and related infrastructure.
- Implemented cluster monitoring using events and alerts, integrating scripts and tooling to detect anomalies and trigger proactive remediation actions.
- Collaborated with cross-functional teams and stakeholders to identify operational gaps and implement workflow improvements that increased productivity and stability.

SKILLS

- Amazon Web Services (AWS)
- LLM, RAG, Agentic AI
- NLP
- GitHub
- Terraform
- Shell scripting
- MLOps
- Python
- Performance monitoring
- Hadoop Ecosystem

EDUCATION

Hong Kong University of Science And Technology

Clear Water Bay

Master of Science: Artificial Intelligence

- Merit-based scholarships

MS ENGINEERING Collage

Bangalore

B.E: Computer Science

- I have Completed my B.E in Computer science, "First Class with Distinction "
- 7.99CGPA

S.D.S.M School For Excellence

Jamshedpur

12th (High School)

S.D.S.M School For Excellence

Jamshedpur

10th

- Mentored junior analysts and engineers, sharing best practices in infrastructure operations, automation, and incident handling.

PHDATA - Big Data and DevOps Engineer

Bangalore

08/2019 - 01/2023

- Implemented and maintained Hadoop and cloud environments, ensuring reliability, security, and performance for large-scale data processing workloads.
- Diagnosed complex platform and infrastructure problems and delivered constructive, permanent solutions to reduce repeat incidents.
- Troubleshoot issues related to Linux memory, CPU, operating system, storage, and network, working as an escalation point for critical incidents.

BSNL - Intern

Jharkhand

01/2019 - 03/2019

- Gained hands-on exposure to networking concepts, how services are accessed over the web, and foundational aspects of network security.
- Developed an interest in large-scale network and infrastructure design through practical observations of telecom operations.

LANGUAGES

English

HOBBIES

- Learning new technologies in my free time
- Attending technical meetups
- Interacting and learning new culture

AI PROJECTS

- **LLM RAG-Based Search Engine:** Built a semantic search and question-answering system using chunking, embeddings, vector retrieval, reranking, and LLM-based answer generation.
- **Multi-Agent System Testbed for Data Analysis:** Built a visual workflow builder for multi-agent data-analysis pipelines with configurable agents, LLM selection, topology control, and human-AI interaction research focus.
- **Adversarial Training Lab for Cybersecurity:** Developed a modular adversarial robustness pipeline for ResNet18 on CIFAR-10 using FGSM and PGD attacks, adversarial training, and reproducible evaluation.
- **HCI Design for AI Systems:** Designed user-centered interfaces and portfolio artifacts to improve usability, interaction flow, and clarity in AI-driven tools.
